

**Zbirnik obravnavanih vprašanj in anket na Prvi predstavitveni delavnici –
Javno posvetovanje »Prenova metodologije obračunavanja omrežnine in
tarifnega sistema«**

Spletna izvedba, 22. april 2021

Besedilo vprašanja za razpravo	Št. glasov	Status	Vir
Dobro bi bilo osvežiti izhodišča za sedanjo metodologijo.	3	Odgovorjeno	Slido
Ali se bodo posnetki in gradivo delili z udeleženci?	2	Odgovorjeno	Slido
Uveljavitev nove metodologije šele okoli 2028? izjemno dolgo obdobje glede na še hitrejše spremembe v el. energetskih omrežjih...	2	Odgovorjeno	Slido
Ali bo prenovljeni RO veljaven s 1.1.2022 ali s 1.1.2023?	3	Odgovorjeno	Slido
Aliki se bo metodologija spreminjala tudi med regulativnim obdobjem, v RO 2022-2024, npr. s 1. 1. 2023,?	1	Odgovorjeno	Slido
Determining distributional equity: "charges should be proportional to the economic capability of each user." How will you determine economic status of users?	5	Odgovorjeno	Slido
Why do you want to change peak times? They are already well defined.	2	Odgovorjeno	Slido
Ali je obstaja kakšna ocena, kako bodo spremembe vplivale na stroške omrežnine odjemalcev, ki imajo proizvodnjo 24/7 in razmeroma konstanten odjem iz omrežja?	2	Odgovorjeno	Slido
Kako bo ta metodologija upoštevala ranljive uporabnike (energy poverty)	3	Odgovorjeno	Slido
Kako bodo obravnavani veliki porabniki? Bodo še vedno deležni subvencioniranja?	2	Odgovorjeno	Slido
Ali bo na računu za omrežnino še postavka obračunska moč?	1	Odgovorjeno	Slido
Would you like to implement dynamic power charge of household consumption and small business consumption?	1	Odgovorjeno	Slido
So že kakšni kriteriji za tarifne postavke za odjemalce, ki prilagajajo svoj odjem? - v smislu, večji del odjemne moči prilagaja, nižje so tarifne postavke.	1	Odgovorjeno	Slido
TARIFS for EV -> is going to be new consumer group?	2	Odgovorjeno	Slido
Na kakšen način se bo nadomeščalo morebitne manjkajoče podatke potrebne za izvedbo izračunov?	4	Odgovorjeno	Slido
After new methodology implemented, will there be some simulations compared to current methodology in every consumer group?	0	Odgovorjeno	Slido
Mišljeni so manjkajoči merilni podatki	1	Odgovorjeno	Slido
Po EU direktivi 2019/944 so predvidene tarife za Citizen energy communities. Ali bo implementacije teh tarif pri nas podobna sedanjemu 137. členu omr. akta?	3	Odgovorjeno	Slido
Na kakšen način je predvideno za odjemalce, da bodo določili zakupljeno moč po posameznih tarifah? Pri dobavitelju, pri distributerju, kje drugje?	1	Odgovorjeno	Slido

Zanima me kako bo s KT urami v novi metodologiji? Še sploh bodo v "uporabi"?	/	Odgovorjeno	GTMChat
Would you mind to perhaps to explain, to give some details, on how long it will take that they, consumer or the prosumer community will react on the new methodology for calculating these charges. Because we know that it takes normally a time span of perhaps 3 years that something can be changed at least as used to be in our country. But you have perhaps some experience on how the consumers or prosumers will give a reply so to say, the time needed that they will act according to the stimulus given by the new approach. I believe that you perhaps have used this methodology in some perhaps in Spain or in some other countries. How long it takes that consumers react/replay on this new methodology. Because we would like to make them behaving according to the optimal operation of the system, so to say.	/	Odgovorjeno	Diskusija v živo
Do you believe that perhaps the role of aggregators can somehow help to enhance and make this process faster?	/	Odgovorjeno	Diskusija v živo
